Erasmus+ calendar app

Project number: 2025-1PL01-KA121-VET-000310604

App author: Wiktor Golicz

Project description

The created app is a group planning tool for Erasmus-related school activities. Its purpose is to help teachers and students keep shared events, assignments, and responsibilities organized in one place.

The project supports use cases such as creating class or project groups, inviting users, publishing group-wide events, assigning tasks to students, and tracking task progress. Teachers can manage groups, members, events, invitations, and assignments, while students can view relevant schedules, follow assigned work, update progress, and complete tasks.

App is available for internal school use at: https://erasmus.zse.edu.pl/kalendarz/login

Technical details

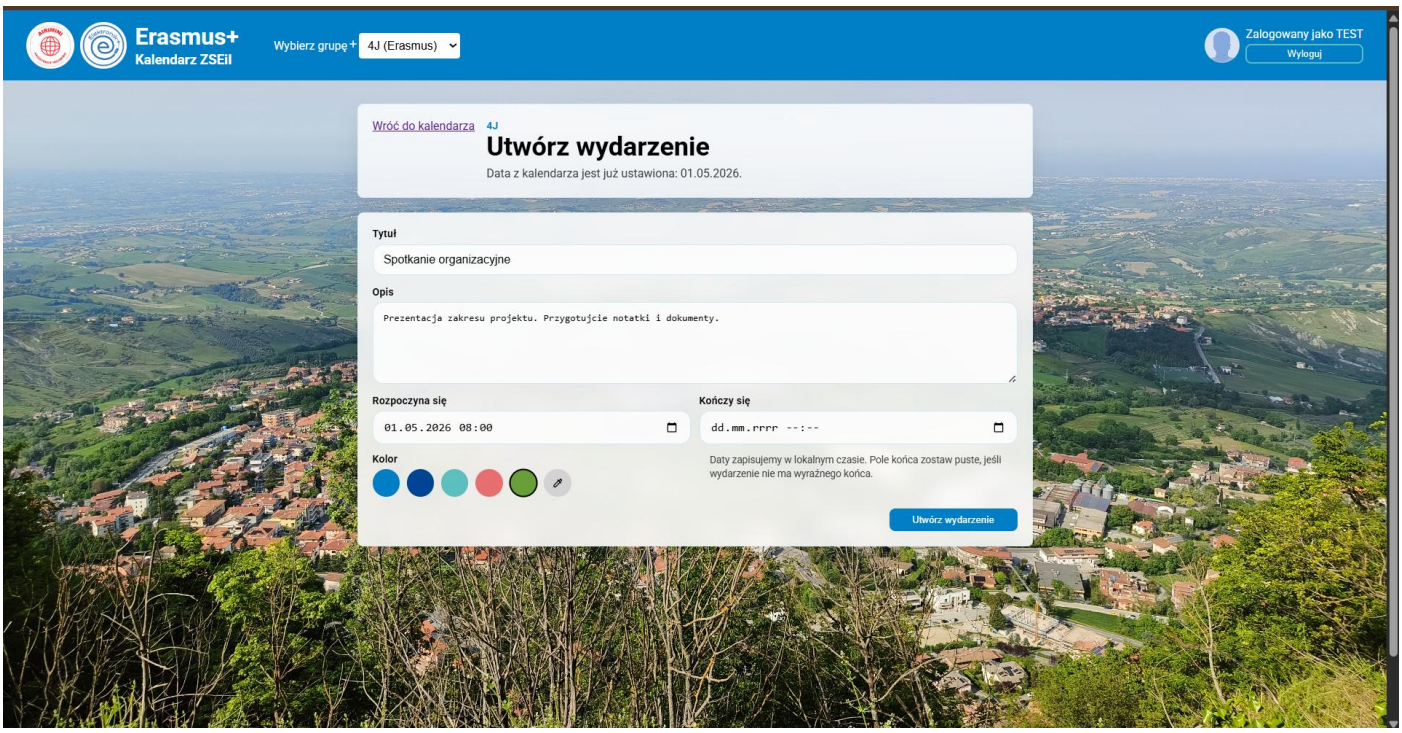

The app is built as a web application with a separate frontend, backend API, and database. The frontend uses React to provide the user interface, while the backend is a PHP API responsible for authentication, permissions, business rules, and data access. The application stores its data in a relational SQL database.
